

Nomination Guidelines: The Tadeusz Sendzimir Applied Sciences Award

PIASA is soliciting nominations for the Tadeusz Sendzimir Applied Sciences Award. The Award was established by PIASA in 1996 in an effort to recognize excellence, individual achievement and innovative contributions in the field of applied sciences. Exceptional Polish-American scientists who live and work in the United States are eligible for the Award.

The field of applied sciences includes branches of science and technology in which existing scientific knowledge is applied to develop practical applications, inventions or other technological advancements. Examples of disciplines within applied sciences are listed at en.wikipedia.org/wiki/Outline_of_applied_science#Branches_of_applied_science.

Nominators need to provide a letter of justification and a curriculum vitae of the nominee that includes a bibliography of significant publications or a list of accomplishments. Up to three additional letters of support may be provided. Nomination is made by submitting the requested materials to mandeck@pharmaseq.com. The submission deadline is March 1, 2017.

The Tadeusz Sendzimir Applied Sciences Award winner will be announced on during the PIASA Congress in Krakow (Poland) in June 2017. Unsuccessful nominees will automatically be reconsidered for the Award for the subsequent five years. Nominators will be given the opportunity to update the nomination for those being reconsidered.

Tadeusz Sendzimir (1894–1989) received worldwide recognition for his outstanding and numerous contributions to metallurgy (en.wikipedia.org/wiki/Tadeusz_Sendzimir). A list of previous recipients of the Sendzimir Award is provided at piasa.org/awards.html.
